

San Maurizio d'Opaglio, 03/07/2025

Object: "Communication on the presence of SVHC substances in articles according to Art. 33.1 of the European Regulation on the Registration, Authorization and Restriction of Chemical Substances – EC Regulation no. 1907/2006 and subsequent amendments - REACH)"

Dear Customer

The EC Regulation No. 1907/2006 (REACH) is a European Union regulation, that aims to enhance the protection of human health and the environment from risks posed by chemical substances, while simultaneously boosting the competitiveness of the EU chemical industry. The aforementioned regulation outlines the procedures for collecting and evaluating information on the properties of substances and the dangers they pose, both in their original form and as components of mixtures or articles.

In accordance with REACH Regulation, the actors in the supply chain must identify, in relation to the articles, the presence of substances called SVHC (Substances of Very High Concern) and included in the "Candidate List" based on art. 59 of the aforementioned regulation. The list of SVHC substances is updated periodically by the European Chemical Agency (ECHA) and is accessible at the following web address: <https://echa.europa.eu/en/scip-database>

Therefore, in accordance with Article 33.1 of the REACH Regulation, TOF s.r.l. is required to communicate the presence of the aforementioned SVHC substances in articles supplied if they are present in concentrations exceeding 0.1% (w/w). As established by the ruling of the European Court of Justice in case C-106/14, this limit is to be considered in relation to all objects, whether they represent a simple article or are components incorporated into a "complex article" (i.e., an article contained in a larger macro-article).

Furthermore, as required by Article 9.1 of Directive (EU) 2018/851, starting from January 5, 2021, requires
